The Morning Brief

JUNE 14, 2026

Sunday Slip

Iran's Foreign Ministry walks back the Sunday MOU timeline as Pakistan frames a digital signing — FOMC and G7 Évian anchor the week ahead.

S&P 500 (FRI CLOSE)	BRENT (BNO FRI)	BITCOIN (IBIT FRI)	IRAN MOU	FEAR & GREED
$741.75 · ↑0.54% · ~↑1.6% on the week	$47.82 · ↓2.67% · continued compression	$36.04 · flat · range-bound	Sunday signing ruled out per IRNA Saturday	34 · Fear (CNN, Jun 12 read; data drop fell back to crypto)

SECTION 01

Markets — Week in Review

THE WEEK CLOSED CONSTRUCTIVELY WITH THE S&P 500 PROXY AT $741.75 (↑0.54% FRIDAY AND APPROXIMATELY ↑1.6% ON THE WEEK PER THE DATA DROP AND ADVISOR PERSPECTIVES COVERAGE), THE NASDAQ PROXY AT $721.34 (↑0.59%), THE DOW PROXY AT $513.06 (↑0.73%), AND THE RUSSELL 2K PROXY AT $292.95 (↑0.87%) — LEADERSHIP CONTINUED TO ROTATE FROM DEFENSIVES BACK INTO MATERIALS (XLB ↑1.87%), FINANCIALS (XLF ↑1.37%), AND TECH (XLK ↑0.87%) AS UVXY (VIX PROXY) ↓6.75% TO $28.73 CONFIRMED THE VOLATILITY COMPLEX CONTINUED TO COMPRESS ON THE DE-ESCALATION TAPE, EVEN AS IRAN'S FOREIGN MINISTRY WALKED BACK THE SUNDAY SIGNING TIMELINE LATE SATURDAY PER IRNA-SOURCED REUTERS COVERAGE

The week resolved as three cross-currents reconciled per the prior briefs' framing: the hot May CPI/PPI complex, the Trump-Iran de-escalation track, and the AI-infrastructure backbone reinforced by the Oracle (Wednesday) and Adobe (Thursday) prints. Friday's leadership confirmed the pattern: AMD ↑4.73% to $511.57 on a Citi upgrade to Buy with a $575 price target per Yahoo coverage following the Meta $60B / 6 GW AMD Instinct GPU partnership disclosure earlier in the week, QCOM ↑4.32% to $211.72 on a constructive Wells Fargo note ahead of Investor Day per Yahoo, and MARA ↑3.45% to $14.08 on the SeekingAlpha read-through to the broader AI-infrastructure pivot. The sleeve dispersion was meaningful at the tails: CRDO ↓5.27% to $250.81 following a SeekingAlpha downgrade to Hold per the article, and LMT ↓1.52% to $540.33 paring Thursday's defense bid even as the company received approximately $10B in new Pentagon defense awards per Yahoo coverage.

S&P 500 (FRI CLOSE)	$741.75 · ↑0.54% · ~↑1.6% on the week
NASDAQ (FRI CLOSE)	$721.34 · ↑0.59%
RUSSELL 2K (FRI CLOSE)	$292.95 · ↑0.87% · small-caps led intraday
UVXY (VIX PROXY)	$28.73 · ↓6.75% · vol compression continued
AMD · QCOM · MARA	↑4.73% · ↑4.32% · ↑3.45%
CRDO · LMT · ABT	↓5.27% · ↓1.52% · ↓1.64%
BRENT (BNO FRI) · WTI (USO FRI)	$47.82 ↓2.67% · $125.43 ↓2.64%
GOLD (GLD) · SILVER (SLV)	$386.54 ↑0.06% · $61.29 ↑0.77%
FOMC WINDOW	Jun 16–17 · ~97% hold per Chase preview coverage

THE JUNE 16–17 FOMC MEETING REMAINS THE BINDING NEAR-TERM MACRO ANCHOR AND CHAIRS KEVIN WARSH'S FIRST SESSION FOLLOWING HIS MAY 22 SWEARING-IN PER CHASE PERSONAL INVESTING COVERAGE — THE CME FEDWATCH-IMPLIED PROBABILITY OF HOLDING THE TARGET RANGE SITS NEAR 97% PER THE CHASE PREVIEW FRAMING, WITH THE DOT PLOT, THE BIAS-SHIFT LANGUAGE OUT OF A PREVIOUSLY EASED POSTURE, AND WARSH'S FIRST PRESS CONFERENCE CARRYING THE CROSS-ASSET SIGNAL RATHER THAN THE RATE DECISION ITSELF

Per Chase Personal Investing and Council on Foreign Relations coverage, market participants expect an explicit move away from a bias toward easing toward a more neutral framing; per the Trading Key analysis, Warsh has previously criticized forward guidance during his Senate confirmation, suggesting the Q&A may be substantively different in tone from the Powell template. The cross-asset variables tied to the meeting include: TLT $85.77 (↓0.24% Friday), the digital ETFs (IBIT, ETHA), and the rate-sensitive growth holdings (NVDA, AMD, CRDO, MRVL, FTNT). The position-symmetric framework Carson has anchored across the recent briefs remains operative through whichever side of the bias-language conversation the committee lands on.

A constructive week resolved upward despite the cross-currents, but the weekend signing slip and the FOMC framing combine to make Monday's open more variable than Friday's close would suggest.

Avoid Erosion.

SECTION 02

Geopolitics — The Sunday Slip

IRAN'S FOREIGN MINISTRY SPOKESPERSON ESMAEIL BAGHAEI STATED SATURDAY VIA STATE MEDIA THAT THE SIGNING OF THE SO-CALLED ISLAMABAD MEMORANDUM WILL NOT TAKE PLACE SUNDAY PER REUTERS AND AL-MONITOR COVERAGE — BAGHAEI INDICATED A SIGNING LATER IN THE COMING DAYS COULD NOT BE RULED OUT BUT CITED RELUCTANCE FROM THE U.S. COUNTERPARTY AS THE REASON FOR CAUTION ON A FIRM DATE; SEPARATELY, PAKISTAN'S GOVERNMENT INDICATED THE MEMORANDUM COULD STILL BE SIGNED DIGITALLY SUNDAY PER IRAN INTERNATIONAL LIVE COVERAGE, EVEN AS PRESIDENT TRUMP WROTE ON TRUTH SOCIAL FRIDAY THAT A SUNDAY SIGNING WAS SCHEDULED PER THE LIVE COVERAGE

The conflicting signaling carries direct cross-asset implications for Monday's open. The reported framework structure remains as Axios disclosed last week (60-day ceasefire including Lebanon, Strait of Hormuz reopen without tolls, Iranian mine-clearing, a U.S. sanctions-waiver framework permitting freer Iranian oil sales, and a separate nuclear-program negotiation track with uranium-stockpile detail deferred to a second accord). Per the position-symmetric framework Carson anchored across the prior briefs, FCI's energy sleeve (DVN, CVX, OKE, VLO, CNX) carries the structural-compression scenario if the digital signing materializes Sunday and the same sleeve carries the structural-disruption hedge if the signing slips further into the week. The defense sleeve (LMT, GD) holds the long-cycle backlog framework regardless — per Yahoo coverage Friday, LMT received approximately $10B in new Pentagon defense awards even as the stock paired Thursday's defense bid. **The physical world matters.**

THE G7 LEADERS' SUMMIT CONVENES AT ÉVIAN, FRANCE FROM MONDAY JUNE 15 THROUGH WEDNESDAY JUNE 17 PER EUROPEAN COUNCIL COVERAGE — THE AGENDA OVERLAPS DIRECTLY WITH THE FOMC MEETING AND REPORTEDLY INCLUDES THE US-IRAN FRAMEWORK, THE JULY 24 EXPIRATION OF THE TRUMP ADMINISTRATION'S 15% SECTION 122 UNIVERSAL TARIFF PER GLOBAL TRADE ALERT COVERAGE, AND A RARE-EARTH SUPPLY-CHAIN DIALOGUE PER TECH TIMES COVERAGE

The tariff calendar carries direct portfolio relevance: per the Section 122 statutory framework, the 15% surcharge expires automatically at 12:01 a.m. ET on July 24 absent Congressional extension legislation, which per Global Trade Alert has not cleared committee — the administration has initiated Section 301 investigations that could form a replacement framework but no successor tariff has been formally announced. The base-case path could materially compress import costs for non-USMCA goods at the July deadline, with implications for FCI's consumer-staple, retailer-adjacent, and supply-chain-sensitive sleeves. The crypto complex stayed range-bound through the week with IBIT $36.04 flat Friday and ETHA $12.57 ↓1.02% per the data drop; per Benzinga coverage Friday, the technical structure carries an approximately $4.4B headwind reference into next week, framing the digital-asset sleeve's near-term tape against the broader risk-asset bid.

IRAN STATEMENT (SAT)	Sunday signing ruled out per IRNA/Reuters · Baghaei
PAKISTAN POSTURE	Digital signing possible Sunday per Iran International
TRUMP (FRI)	Indicated Sunday signing scheduled per Truth Social
FRAMEWORK	60-day ceasefire · Hormuz reopen · sanctions waivers per Axios
G7 SUMMIT	Évian, France · Jun 15–17 · overlaps FOMC
SEC. 122 TARIFF	15% universal · expires 12:01 a.m. ET Jul 24 per GTA
BRENT (BNO FRI)	$47.82 · ↓2.67% · lowest since early March per Yahoo
FCI ENERGY SLEEVE	Position-symmetric framework remains operative

SECTION 03

On Our Radar

1. Week Ahead — FOMC June 16–17 anchors the calendar as Kevin Warsh chairs his first meeting following the May 22 swearing-in per Chase Personal Investing coverage, with CME-implied odds near 97% of holding the target range steady per the same preview. Per Trading Key and Council on Foreign Relations coverage, the binding signal sits in the dot plot, the bias-shift language out of a previously eased posture, and the Warsh-led press conference rather than the rate decision itself. The economic calendar layers the data flow: Industrial Production (Mon May), Housing Starts & Building Permits (Tue May), and Retail Sales (Wed May) per the Scotiabank calendar, framing the inflation/activity backdrop alongside the bias-language conversation. For FCI's rate-sensitive sleeves (TLT, IBIT, ETHA, and the AI-infrastructure growth backbone), this is the principal cross-asset variable into next week. *Avoid Erosion.*

2. The Iran signing-slip dynamics frame Monday's energy and risk-asset tape against three asymmetric scenarios. Per Reuters and AL-Monitor coverage Saturday, Iran's Foreign Ministry stepped back from the Sunday timeline with Baghaei citing reluctance from the other side while leaving open a signing later in the week. Per Iran International, Pakistan continues to frame a possible digital signing Sunday, and per Truth Social Friday President Trump indicated the deal was scheduled to be signed Sunday. A weekend digital signing would likely extend the Brent compression heading into Monday's open and frame the FCI energy sleeve's tape against the cash-flow durability of the holdings (DVN's 70% shareholder-return framework, CVX's dividend complex, OKE's midstream stability). A further slip would re-introduce a measured geopolitical premium into the oil complex and leave the position-symmetric framework operative as the structural-disruption hedge. *Think Like an Owner.*

3. The AMD-Meta partnership disclosed earlier in the week (a six-gigawatt AI data-center deployment built on AMD Instinct GPUs starting with the MI450 accelerator per Yahoo and Jon Peddie Research coverage) was substantially validated Friday when Citi analyst Atif Malik upgraded AMD to Buy from Neutral and raised the price target to $575 from $460 per Yahoo coverage — AMD ↑4.73% to $511.57 was the FCI cohort's top mover. Per the company disclosure, the agreement includes a performance-based warrant covering up to 160M AMD shares with vesting tied to shipment milestones, with the first one-gigawatt tranche slated for the second half of 2026. The read-through to the AI-infrastructure cohort remains constructive: TSM ↑0.68% to $423.93, KEYS ↑3.13% to $350.67, LRCX ↑1.18% to $366.81. The CRDO ↓5.27% to $250.81 print reflected a SeekingAlpha downgrade to Hold per the article framing rather than a thesis re-rating — the read-through to the broader supplier sleeve carries a name-specific rather than systemic signal. *Research Reveals Opportunities.*

4. Carson's active SPY $645.80 support remains materially untouched. The Friday session's S&P 500 proxy range ($735.03–$744.44 per the data drop) carried well above Carson's level, leaving the framework as the committee's downside reference rather than an actionable near-term marker. With the index closing the week at fresh highs and the Fear & Greed gauge reading 34 (Fear) heading into Friday per the CNN live endpoint (the data drop's F&G fell back to the crypto index at 18 per the workflow note), the rally continues to occur against still-cautious sentiment positioning. The weekend signing slip and the FOMC framing combine to make Monday's tape the first material test of the position-symmetric framework since the prior week's escalation-de-escalation cycle. *Simplicity Over Complexity.*
