The Morning Brief

JUNE 15, 2026

Hormuz Opens

Trump confirms Iran deal complete with Friday Geneva signing; oil collapses, futures lift as Israel's Beirut strikes complicate the Lebanon track into FOMC.

S&P 500 (FRI CLOSE)	ES FUTURES (SUN PM)	BRENT (MON AM ASIA)	FOMC	FEAR & GREED
$741.75 · ↑0.54%	~↑1% · Iran-deal lift per Stocktwits	~$83 · ↓4.7% · lowest since Mar per Reuters	Tue–Wed · Warsh chair debut · ~97% hold per CME	34 · Fear (CNN, Jun 12 read; data drop fell back to crypto)

SECTION 01

Markets — Risk-On Open

U.S. EQUITY FUTURES LIFTED MATERIALLY SUNDAY EVENING FOLLOWING THE TRUMP-SHARIF JOINT ANNOUNCEMENT THAT THE U.S.-IRAN FRAMEWORK DEAL IS "COMPLETE" PER CBS NEWS AND JUST THE NEWS COVERAGE, WITH DOW FUTURES INDICATED APPROXIMATELY ↑0.73%, S&P 500 FUTURES APPROXIMATELY ↑1%, AND NASDAQ 100 FUTURES APPROXIMATELY ↑1.60% AS OF 8:46 P.M. ET PER STOCKTWITS COVERAGE — THE NIKKEI 225 REPORTEDLY CARRIED THE ASIA LIFT WITH A ↑5.41% PRINT PER INVESTTECH MORNING REPORT COVERAGE AS BRENT CRUDE FELL TO APPROXIMATELY $83.25/BBL (↓4.7%) AND WTI TO APPROXIMATELY $80.53/BBL (↓5.1%), BOTH REPORTEDLY THE LOWEST LEVELS SINCE MARCH 10 PER REUTERS/INVESTING.COM

Friday closed constructively with the S&P 500 proxy at $741.75 (↑0.54%), the Nasdaq proxy at $721.34 (↑0.59%), the Dow proxy at $513.06 (↑0.73%), and the Russell 2K proxy at $292.95 (↑0.87%) per the data drop, with leadership rotating into Materials (XLB ↑1.87%), Financials (XLF ↑1.37%), and Tech (XLK ↑0.87%) as UVXY (VIX proxy) ↓6.75% to $28.73 confirmed the volatility complex continuing to compress on the de-escalation tape. The Sunday cross-asset move reverses the Saturday signing-slip caution that anchored yesterday's brief: per Reuters and CBS News coverage Sunday, Trump confirmed the deal is complete, the formal signing will occur Friday, June 19, in Switzerland, and he "fully authorize[d]" the toll-free opening of the Strait of Hormuz alongside the immediate removal of the U.S. naval blockade. The dollar reportedly hit a 10-day low overnight per the Reuters headline run in the data drop, and Indian rupee/bond markets were flagged for a separate Iran-deal lift per Reuters coverage.

ES FUTURES (SUN 8:46 PM ET)	~↑1% · per Stocktwits
NQ FUTURES (SUN 8:46 PM ET)	~↑1.60% · per Stocktwits
NIKKEI 225 (MON)	~↑5.41% · per Investtech Morning Report
BRENT (MON AM)	~$83.25 · ↓4.7% · lowest since Mar 10 per Reuters
WTI (MON AM)	~$80.53 · ↓5.1% per Reuters
DOLLAR INDEX	10-day low overnight per Reuters
UVXY (FRI CLOSE)	$28.73 · ↓6.75% · vol compression continued
FRIDAY TOP MOVERS	AMD ↑4.73% · QCOM ↑4.32% · NTR ↑3.14%

THE JUNE 16–17 FOMC MEETING ANCHORS THE DOMESTIC MACRO TAPE BEGINNING TOMORROW — KEVIN WARSH'S FIRST SESSION AS CHAIR FOLLOWING THE MAY 22 SWEARING-IN PER THE PRIOR BRIEF AND CHASE PERSONAL INVESTING COVERAGE — WITH THE CME FEDWATCH-IMPLIED PROBABILITY OF HOLDING THE TARGET RANGE AT APPROXIMATELY 97.4% PER COINGAPE AND MITRADE PREVIEW COVERAGE, FRAMING THE MEETING AS PRIMARILY A DOT-PLOT, BIAS-LANGUAGE, AND PRESS-CONFERENCE EVENT RATHER THAN A RATE-DECISION EVENT; PER A REUTERS POLL REFERENCED IN THE MITRADE PREVIEW, 72 OF 102 ECONOMISTS EXPECT RATES HELD THROUGH YEAR-END 2026

Per Coingape and Mitrade coverage, the binding signal sits in whether the Summary of Economic Projections pushes the first 2026 cut into 2027 or keeps a September window open, and whether Warsh's press conference confirms an explicit move from a previously eased bias toward a neutral framing. Per Trading Key, Warsh has previously criticized forward guidance during his Senate confirmation, suggesting the Q&A tone may differ materially from the Powell template. The data calendar layers around the meeting: per Kiplinger and Train2Invest coverage, the Empire State Manufacturing print and the May Industrial Production print land today, May Housing Starts and Building Permits Tuesday, and May Retail Sales Wednesday alongside the rate decision and the dot plot. The cross-asset variables remain TLT $85.77 (↓0.24% Friday), the digital ETFs (IBIT $36.04 flat, ETHA $12.57 ↓1.02%), and the rate-sensitive growth holdings (NVDA, AMD, CRDO, MRVL, FTNT). Note: Friday June 19 is the Juneteenth holiday and the NYSE/Nasdaq are closed per the standard exchange calendar, compressing the week's post-FOMC trading window to Thursday alone.

A constructive Friday close, a Sunday risk-on lift on the deal confirmation, and a hardened Brent compression frame the week, but the Israel-Lebanon strikes against the Lebanon-related deal language and the Warsh-led FOMC introduce two-sided event-risk into a holiday-compressed week.

Avoid Erosion.

SECTION 02

Geopolitics — Deal Confirmed, Lebanon Frays

PRESIDENT TRUMP CONFIRMED SUNDAY VIA TRUTH SOCIAL AND JOINT ANNOUNCEMENT WITH PAKISTAN'S PRIME MINISTER SHEHBAZ SHARIF THAT THE U.S.-IRAN FRAMEWORK DEAL IS "NOW COMPLETE" PER CBS NEWS, RFE/RL, AND JUST THE NEWS COVERAGE — TRUMP STATED HE "FULLY AUTHORIZE[D]" THE TOLL-FREE OPENING OF THE STRAIT OF HORMUZ AND THE IMMEDIATE REMOVAL OF THE U.S. NAVAL BLOCKADE PER TIMES OF ISRAEL LIVE COVERAGE, WITH THE FORMAL SIGNING CEREMONY NOW SCHEDULED FOR FRIDAY, JUNE 19 IN SWITZERLAND PER MULTIPLE OUTLETS — THE SIGNING DATE FALLS ON JUNETEENTH WITH U.S. MARKETS CLOSED PER THE EXCHANGE CALENDAR, COMPRESSING THE DOMESTIC REACTION WINDOW TO THE FOLLOWING MONDAY OPEN

Per Reuters, Al Jazeera, and CBS News coverage, U.S. Vice President JD Vance and Special Envoy Steve Witkoff are expected to represent the United States at the Geneva ceremony; per Reuters-sourced reporting, Iran's Parliament Speaker Mohammad Baqer Qalibaf remains the reported Iranian signatory, with Trump indicating he will not personally attend. Per Press TV and Just The News coverage, Iran's deputy foreign minister stated the 60-day nuclear-program negotiations would begin only after the U.S. releases billions in frozen Iranian funds, signaling the sequencing dispute that may yet shape the post-signing tape. Per the position-symmetric framework Carson has anchored across recent briefs, FCI's energy sleeve (DVN, CVX, OKE, VLO, CNX) carries the structural-compression scenario as the geopolitical premium drains from the Brent complex, with cash-flow durability (DVN's 70% shareholder-return framework, CVX's dividend complex, OKE's midstream stability) anchoring the holdings against the Brent lower-volatility regime that follows a Hormuz reopen; the defense sleeve (LMT, GD) holds the long-cycle backlog framework regardless, per the prior brief's LMT $10B Pentagon-awards coverage and the broader production-ramp commentary. **The physical world matters.**

ISRAEL'S SUNDAY STRIKES ON HEZBOLLAH TARGETS IN BEIRUT REPORTEDLY KILLED AT LEAST THREE AND WOUNDED SEVERAL PER AL JAZEERA AND LEBANESE CIVIL DEFENCE COVERAGE — NETANYAHU'S OFFICE CITED HEZBOLLAH PROJECTILE ATTACKS ON NORTHERN ISRAEL AS THE TRIGGER PER CBS — AND PER CNBC AND INQUIRER COVERAGE, TRUMP HAS PRESSED NETANYAHU TO STOP HITTING LEBANON WHILE THE DEAL IS NEAR BUT THE PRIME MINISTER HAS "DEFIED" HIM, WITH NETANYAHU REPORTEDLY TELLING TRUMP ISRAEL WILL NOT PULL TROOPS FROM LEBANON AND DOES NOT CONSIDER ITSELF OBLIGATED TO THE LEBANON-RELATED PARTS OF THE FRAMEWORK

The Israel-Lebanon track represents the principal known fragility in the framework heading into Friday's scheduled signing. Per Iran's public posture sourced via Reuters, the deal must end fighting in Lebanon as part of the cessation-of-hostilities provision; per CNBC, Iran threatened a military response to the Sunday strikes, re-introducing two-sided risk into the energy complex even as the broader framework holds. The G7 leaders' summit at Évian-les-Bains, France runs Monday June 15 through Wednesday June 17 per the European Council agenda, with President Macron hosting and leaders expected to press for framework details and a Hormuz-reopen timeline per Reuters and IndexBox coverage. Per CFR coverage, the summit agenda also covers the U.S. tariff complex (with European leaders carrying complaints about U.S. EU tariffs and Trump's NATO posture), and per the Élysée diary, President Zelenskyy joins a working session Tuesday titled "Building Peace and Security for Ukraine and Europe." The agenda overlap with the FOMC introduces secondary headline risk into Wednesday's session particularly. **The physical world matters.**

DEAL CONFIRMED (SUN)	Trump-Sharif joint announcement per CBS/RFE-RL
SIGNING	Geneva, Switzerland · Friday Jun 19 per Reuters
U.S. REPS	VP Vance · SE Witkoff per CBS
IRAN POSTURE	60-day nuke talks gated on frozen-fund release per Press TV
ISRAEL-LEBANON	Beirut strikes Sun · at least 3 killed per Al Jazeera
NETANYAHU POSTURE	Defied Trump · not bound to Lebanon track per Inquirer
G7 SUMMIT	Évian, France · Jun 15–17 · Zelenskyy joins Tue
BRENT (MON AM)	~$83.25 · ↓4.7% · Mar low per Reuters

SECTION 03

On Our Radar

1. Week Ahead — the data calendar lands in front of Warsh's first FOMC press conference Wednesday. Per Kiplinger and Train2Invest coverage, the Empire State Manufacturing Index and May Industrial Production print today, May Housing Starts and Building Permits Tuesday alongside Day 1 of the FOMC, and May Retail Sales Wednesday alongside the rate decision, the fresh dot plot, and the press conference. Per Coingape and Mitrade, CME FedWatch implies approximately a 97% probability of a hold and the Reuters poll referenced in the Mitrade preview shows 72 of 102 economists expecting rates held through year-end. The binding signal sits in the bias-language shift away from a previously eased posture, whether the SEP pushes the first 2026 cut into 2027 or keeps a September window open, and Warsh's tone in his first press conference. Friday is the Juneteenth holiday with U.S. equity and bond markets closed per the exchange calendar, compressing the post-FOMC trading window to Thursday alone. For FCI's rate-sensitive sleeves (TLT, IBIT, ETHA, the AI-infrastructure growth backbone), this is the principal cross-asset variable into next week. *Avoid Erosion.*

2. The Iran framework deal confirmation Sunday compresses the Brent premium materially heading into Monday's U.S. open, with Brent reportedly approximately ↓4.7% to $83.25/bbl and WTI approximately ↓5.1% to $80.53/bbl in overnight trade per Reuters and Investing.com coverage — both reportedly the lowest levels since March 10. Per the Washington Times coverage of energy experts, supply normalization could take months to materialize even with a clean Hormuz reopen given mine-clearing requirements; per the data drop, Brent (BNO) closed Friday at $47.82 (↓2.67%) and WTI (USO) at $125.43 (↓2.64%), reflecting the Saturday signing-slip caution that has now resolved upward on the Sunday confirmation. The position-symmetric framework Carson anchored across the prior briefs operates through the holdings' cash-flow durability: DVN's 70% shareholder-return framework, CVX's dividend complex, OKE's midstream stability, and VLO's refining-margin tape under a Brent lower-volatility regime. The Israel-Lebanon strikes Sunday reintroduce two-sided risk into the same complex through Friday's signing window. *Think Like an Owner.*

3. The AMD-Citi upgrade and the broader AI-infrastructure cohort enter Monday's open with continued positive flow per the data drop's overnight-trading headline coverage. Per the data drop's news section, the Yahoo headline "Why NVDA, MU, INTC, Other Chip Stocks Are Rising In Overnight Trading" framed the cohort positively heading into Monday, layered on top of the Citi AMD Buy upgrade Friday with a $575 price target and the Meta-AMD six-gigawatt partnership disclosed earlier in the week per Yahoo coverage and the prior brief. AMD ↑4.73% to $511.57 led the FCI growth sleeve Friday; QCOM ↑4.32% to $211.72 entered the open on the constructive Wells Fargo PT raise to $230 per the data drop coverage ahead of the QCOM Investor Day June 24. The CRDO ↓5.27% to $250.81 print remains a name-specific drag rather than a cohort signal per the prior brief framing, and Marvell (MRVL $279.70 ↓0.36%) and Keysight (KEYS $350.67 ↑3.13%) continue to anchor the AI-supplier complex. *Research Reveals Opportunities.*

4. Carson's active SPY $645.80 support remains materially untouched. Friday's S&P 500 proxy range ($735.03–$744.44 per the data drop) carried well above Carson's framework, leaving the level as the committee's downside reference rather than an actionable near-term marker. With the Sunday futures lift framing a constructive Monday open and the CNN Fear & Greed gauge at 34 (Fear) per the live CNN endpoint as of Friday's read (the data drop's F&G fell back to the crypto index at 20 per the workflow note), the rally continues to occur against still-cautious sentiment positioning rather than euphoric flow. The position-symmetric framework remains anchored on Carson's level through the FOMC, the Iran signing window, and the G7 agenda overlap. *Simplicity Over Complexity.*
