ON CARSON'S RADAR

1. Forward themes stress-tested. Iran conflict activating gold/de-dollarization, AI power demand, copper/metals at once. Real assets and dividend payers proving value.

2. Defense/energy rotation. NOC, LMT, RTX, PLTR, XOM catching bids. Think Like an Owner anticipated these -- flag to Eric.

3. Private credit stress. Redemption surge in flagship fund; Blue Owl halted liquidations. Liquidity mismatch in real time.

4. Earnings today: Target (TGT), Best Buy (BBY) -- consumer check. CrowdStrike (CRWD) -3% pre.

5. Nvidia GTC Mar 16-19. Goldman buy/$250, MS top semi/$260. Catalyst if markets stabilize.

6. Historical: S&P 500 median +0.4% 2wk post-geopolitical events since WWII. Recovery ~1mo. Key: oil duration.

BOTTOM LINE: Avoiding Erosion and Thinking Like an Owner matters most now. Quality ownership -- real assets, pricing power, dividend resilience -- validated in real time. Stay sharp.
